**WRHS Library Media Center**  
Library Media Specialist: Alana Stern, 508-829-6771 ext. 1664  
Media Center Staff: Deb Flynn, Rita Irving, ext. 1627

Media Center hours:  
Monday through Thursday: 7 a.m. to 3:30 p.m.  
Friday: 7 a.m. to 2:10 p.m.

Students may use the Media Center before or after school without a pass. Students must get a pass from their study hall monitors to use the library during a study hall. Because of limited capacity during long block, students with a long-block study must get a pass in the Media Center the previous day, or before school the day of, to use the media center during long block.

The [Library Media Center Website](#) has been updated and expanded. It now features a library blog, research tools, WRHS Library twitterfeed, virtual bookshelf, and more! [Click here to enter.](#)

Alternate titles: The Rockies

**Introduction**

Rocky Mountains, byname the Rockies, mountain range forming the cordilleran backbone of the great upland system that dominates the western North American continent. Generally, the ranges included in the Rockies stretch from northern Alberta and British Columbia southward to New Mexico, a distance of some 3,000 miles (4,800 km). In places the system is 300 or more miles wide.

**Physical features**

**Physiography**

The Canadian Rockies include the northernmost ranges of the Rocky Mountains, which are generally divided into four broad groups: the Canadian Rockies and Northern Rockies of Canada and northern British Columbia; the Middle Rockies of Wyoming, Utah, and southeastern Idaho; the Southern Rockies, mainly in Colorado and New Mexico; and the Colorado Plateau in the Four Corners region of Utah, Colorado, New Mexico, and Arizona. These four subranges differ from each other in terms of geology, origin, age, and type of rocks and physiography. The Canadian Rockies, which are the youngest, are the result of high-altitude tectonic activity during the late Paleozoic and early Mesozoic eras. The Southern Rockies are the oldest, having formed during the Paleozoic era. The Colorado Plateau is a relatively recent feature, having formed during the Cenozoic era. The Middle Rockies are the youngest, having formed during the Cenozoic era.
